- Summary of Literature
- Proposed System & Novelty
- Block Diagram
- Hardware/Software requirements
- References

ABSTRACT

- HiringAI is an intelligent recruitment assistance system.
- Candidates upload resumes through the user interface.
- HR enters job requirements such as skills, experience, and qualifications.
- The system analyzes resumes and recommends suitable candidates.
- Uses Classical AI techniques instead of Machine Learning/Deep Learning.
- Provides transparent hiring decisions with explanations.

OBJECTIVE

- Automate resume screening.
- Allow candidates to upload resumes easily.
- Extract candidate details automatically.
- Match candidates with HR requirements.
- Rank candidates based on suitability.
- Provide explainable recommendations.
- Identify candidate skill gaps.
- Implement AI without ML/DL.

Literature Survey

TITLE	YEAR	AUTHOR	TECHNIQUE
Machine Learning Approach for Resume Classification and Candidate Selection	2022	Kaur and Sharma	Machine Learning-based resume classification
Expert System Based Approach for Employee Recruitment and Selection	2021	Anuradha et al.	Rule-based Expert System
Explainable Artificial Intelligence for Decision Support Systems	2023	Raghavan et al.	Explainable AI (XAI) techniques
Mitigating Algorithm Aversion in Recruiting: A Study on Explainable AI for Conversational Agents"	2024	Jürgen Fleiß, Elisabeth Bäck, Stefan Thalmann	Explainable AI (XAI), AI-based recruitment agents

EXISTING SYSTEM

- Manual resume checking.
- High HR workload.
- Slow candidate selection.
- Human-based evaluation.
- Difficult candidate comparison.

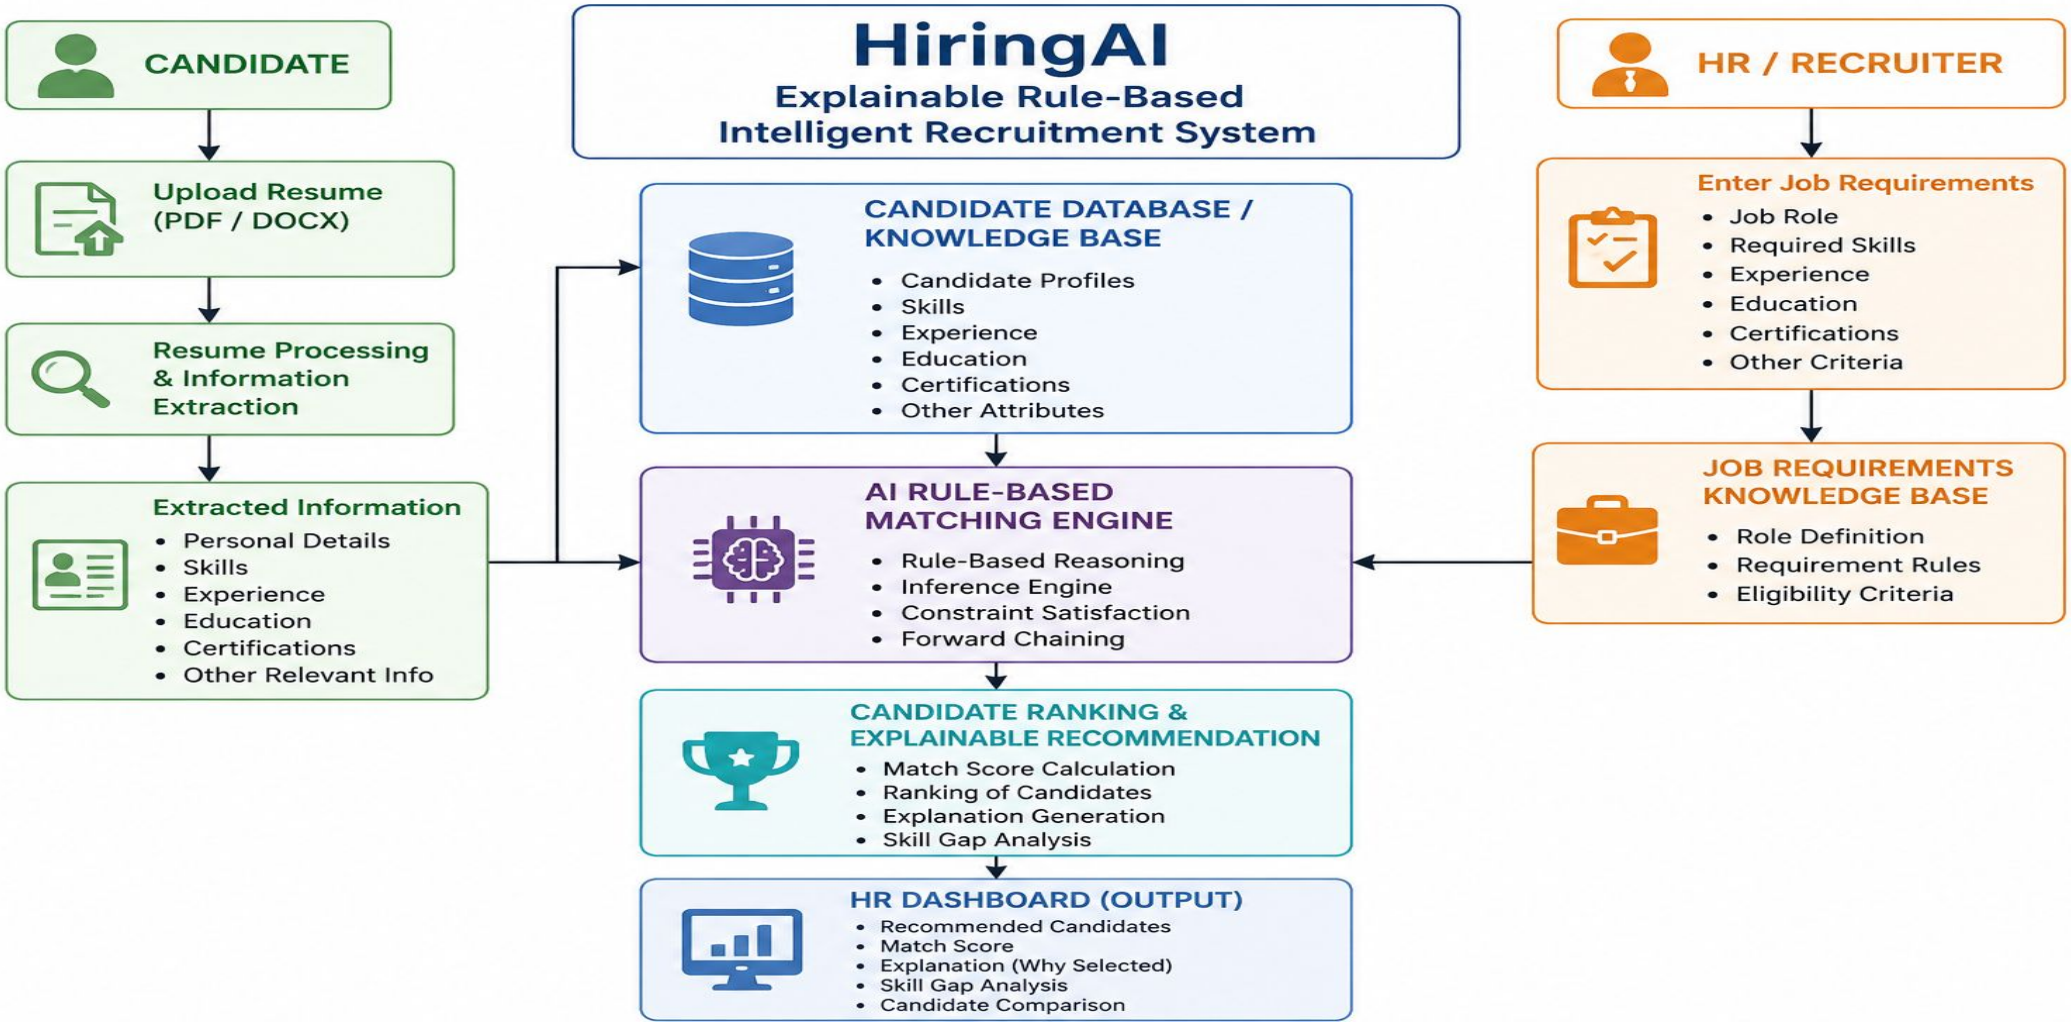

PROPOSED SYSTEM

- Automated resume analysis.
- Rule-based candidate matching.
- AI-based ranking.
- Explainable recommendations.
- Faster recruitment process.

Novelty in Proposed System

- Explainable AI: Provides clear reasons for selecting or rejecting each candidate.
- Automated Resume Screening: Extracts candidate details from uploaded resumes and matches them with job requirements.
- Skill Gap Analysis: Identifies missing skills and certifications to help candidates improve.
- Rule-Based Candidate Ranking: Uses Classical AI rules to rank candidates based on skills, experience, education, and certifications.
- Transparent & Fair Hiring: Ensures consistent and unbiased recommendations using predefined hiring rules without Machine Learning or Deep Learning.

BLOCK DIAGRAM(PROPOSED SYSTEM)

Hardware Requirements

Hardware Requirements	
Component	Specification
Processor	Intel Core i3 / AMD Ryzen 3
RAM	4 GB Minimum
Storage	256 GB SSD
Internet	Required
Monitor	1366×768 or higher

Software Requirement

Software Requirement	
Frontend	HTML, CSS, JavaScript, React.js
Backend	Python, Flask,
Database	SQLite / PostgreSQL
AI & ML	Scikit-learn,Pandas, NumPy
AI Techinque	Rule Engine, Forward Chaining, Knowledge Base
Development Tools	VS Code, Git, GitHub
Operating System	Windows 10/11,Ubuntu Linux
